Experience

SOFTWARE ENGINEER | LAPTOP OUTLET | APRIL 2020 – OCTOBER 2021

- . Led the end-to-end development of www.laptopoutlet.hn, a robust e-commerce platform. The platform contains notable features such as advanced faceted search, Elasticsearch-powered search bar, password-less login, order tracking, automated inventory management, and adherence to SEO (Search Engine Optimization) best practices.
- . Led the development, designed the architecture, crafted the User Interface, and coded a Content Management System and Inventory Management System with role-based access control from scratch.
- . Collaborated with banks to identify an ideal payment processor and successfully planned product delivery logistics.
- . Technologies used: NodeJS, React, HTML, Git, Typescript, Tailwind CSS, Google Cloud, MongoDB, & GraphQL.

SOFTWARE DEVELOPER, INTERN | APPLAND S.A. | OCTOBER 2019 – MARCH 2020

- . Contributed to front-end development & API design for client websites.
- . Collaborated in a team to analyze & implement solutions based on client requirements.
- . Implemented DEVOPs solutions for projects, improving development & operation processes.
- . Designed databases and system architecture for multiple projects.
- . Created presentations for higher managers and clients to report progress on projects & answer concerns.
- . Practiced SCRUM/Agile methodology.
- . Technologies used: React, JavaScript, HTML, CSS, Git, Firebase, MySQL, & AWS.

MARKETING ASSISTANT, INTERN | SYNERGY CONTROLS CORP. | JANUARY 2022 – APRIL 2022

- . Designed and implemented email campaigns using HTML and CSS.
- . Developed Word templates for product pages, announcements, & job postings, improving consistency & efficiency in communication.
- . Participated in a successful phone survey campaign to gather customer feedback.

Education
